South Holland District Council

Proposed Windfarm at West Punctbeck  
OBJECTION. Reference Number H14-0110-13

We are writing to ask the application  
for this windfarm is Refused

We are frightened that if this application goes ahead  
that we will lose our home for a second time because of  
the impact that living near a windfarm has on day to day life

We had to leave our home of 28 years because of noise  
from a nearby windfarm, long periods of noise from the  
blades, mostly worst during the evening + at night  
The noise could be heard both inside and outside of our  
home Another noise problem caused by the windfarm  
near our old home was the persistent quiet buzzing  
noise which made our old home feel as if there  
was some sort of presence there. It made you feel  
agitated and edgy. For Mr Davis this was diagnosed

as tinniturs. but moving away from the DSW windfarm has cured the problem, no more buzzing in the ears

We did not realise how much these noises from Deeping St Nicholas Windfarm were affecting us. Our sleeping was not good. both of us could wake up 3 times a night finding it very difficult to go back to sleep. Now we only wake up once and find it much easier to drop of to sleep, it feels a lot more relaxing in our current home

We are also not disturbed by turbin noise outside our new home when gardening, something that often was not possible at our old home, especially in the evening

Initially we did not see how living near wind turbines could effect us, but having lived so near to Deeping St Nicholas windfarm for nearly six years we can say the noise from it changes your life for the worst. If there is a noise problem the only answer is to move house. the noise is not something you get use to

We are both so and happy and peaceful in our new home. We sleep at night and are able to enjoy life again

---

The prospect of having wind Turbines near our new home fills us with fear. I urge SHDC not to allow this application, not to allow our lives to be destroyed again.

Yours faithfully,

E E Davis
